Biography: Modeline Nicholas Longjohn has been writing since she was nine years old. Over the years, she has written over two score plays and movie scripts, some of which have been used as stage plays in different capacities.
She has also written and published short stories, novel and several articles for magazines and editorials. She currently writes for the Muse, a student run editorial at Memorial University and is working on a second novel in her spare time.
Modeline is currently a PhD candidate in the department of Biochemistry at Memorial University, researching on immunology and cancer.
